

TRAFFIC CALMING PROJECT RATOATH, COUNTY MEATH

CLIENT

comhairle chontae na mí
meath county council

LOCATION

Ratoath, County Meath, Ireland

OVERVIEW

Meath County Council appointed Integrated Utility Services to carry out civils works, installing new traffic calming.

This busy location is adjacent to the Ratoath 'pitch 'n' putt' golf club, Ratoath Harps soccer club, Ratoath GAA club and a gentleman's shed facility. There was a requirement for signalled traffic calming measures, which IUS have provided, resulting in a higher degree of road safety.

SERVICES PROVIDED

- Duties of PSCS
- Traffic management
- Engagement with residents and businesses
- Supply of all utility drawings and completion of site surveys
- Supply and installation of drainage pipes, road gullies & manholes
- Supply and installation of ducts, mini pillars, and chambers for ESB cables
- Supply and installation of ducts, mini pillars, and chambers for pedestrian lighting cables
- Excavation of road crossing for drainage and ducts
- Supply and installation of precast kerbs and tar paths
- Supply and installation of tactile pavers at all crossing points
- Installation of raised platform pedestrian crossing and speed ramps
- Supply and installation of traffic signs and road markings
- Removal and replacement of existing concrete footpaths and driveways

TRAFFIC CALMING PROJECT

RATOATH, COUNTY MEATH

THE PROJECT

This scheme involved the provision of civil works for a new controlled pedestrian crossing with a raised crossing platform. Drainage and ducting works for new traffic lights and ESB Networks had to be installed. This involved carrying out an open-cut road crossing, the provision of concrete bases for control cabinets, and mini pillars.

Three manholes and four gullies were installed to divert storm water into an existing drain. Existing footpaths were upgraded, and 40m of new paths were installed.

Two round top speed ramps were also installed to prevent speeding as vehicles approached the pedestrian crossing. Advanced traffic signage and road markings were supplied and installed.

"Integrated Utility Services delivered an excellent standard of work on the traffic calming project in Ratoath. Given the location's high footfall, adjacent to several busy community facilities, it was essential that the works were completed efficiently and to the highest safety standards. IUS provided signalled traffic calming measures that have significantly improved road safety in the area. Their professionalism, clear communication, and ability to manage works in a live environment were key to the project's success."
