## PRIVATE NETWORK SERVICES

Whatever your needs we can provide the complete power distribution package. Utilising our specialist resources, we aim to deliver the very best in electrical solutions. Our vast experience in the construction, operation and maintenance of power distribution systems, coupled with the knowledge gained from listening to our customers, has placed IUS at the forefront of power distribution engineering. We are dedicated to delivering your power solutions from design, supply, construction and installation, through to the testing and commissioning of electrical distribution systems from 415V to 132kV. These can be new installations, replacement of assets or refurbishment of existing systems for the following:

- Substations and associated buildings
- HV and LV switchgear
- Transformers (including low loss)
- Protection and control systems
- Cables, joints and terminations
- Cable containment systems including excavation and reinstatement of trenches
- Comprehensive asset management solutions for systems up to 66kV
- Operation and maintenance agreements
- Maintenance only agreements
- 24/7 emergency call-out service

# HEALTH & SAFETY

## OUR COMMITMENT TO HEALTH, SAFETY, QUALITY & ENVIRONMENT

IUS has a full time dedicated HSQE team responsible for the implementation of legislation and policy throughout our contracts. This is enhanced by a comprehensive audit schedule across the business by the entire management team. Policies, procedures, work methods and risk assessments are part of a controlled documentation process to ensure an effective safe system of working. Our management procedures, safety excellence and delivery capability has enabled the Company to attain the required standards, accreditations and awards for our business needs.

Accredited Contractor

A leading provider of power infrastructure

# SECTORS WE WORK IN

## **Universities :**

The youth are our future and the UK is quite rightly proud of our education structure and the nations capacity to nurture talent. IUS has been involved in supporting a network of universities from both a construction and maintenance perspective. These establishments need a reliable High Voltage contractor who can respond to new connections on campus, inspection and maintenance of existing assets as well as refurbishment and upgrade works. All within an environment where reliability and dependability, which IUS provide, are vital.

## **Manufacturing, Retail and Construction Industries:**

24 hours a day, 7 days per week IUS are available for our customers. We recognise the importance of their business and we want our customers to focus on what they do best. IUS has the capability, experience and resources to do what we do best, which includes maintaining your power supply. We have the expertise in a very demanding, specialist activity to operate your network safely and assist you in meeting your production needs.

## **Hospitals:**

The power supply to our care establishments throughout the UK is of vital importance. The need to have a reliable energy network with appropriate resilience, including back up generation, can be lifesaving. IUS are very familiar in meeting the exacting standards of health care power requirements and are trusted partners for substation construction as well as inspection and maintenance activity. IUS provide a service our hospitals can rely on.

**INTEGRATED  
UTILITY SERVICES**

# SECTORS WE WORK IN

## **Water Industry:**

The quality of your water supply is critical and the standards in the UK are exemplary. To meet the Nations requirements the various pumping stations and water treatment works need power. IUS construct and maintain the substations, which provide that source of energy. The management of sewage introduces the need for power to treat the effluents, as well as opportunities for a greener environment through generation of the by-products. IUS work extensively within the Water Industry, supporting this primary utility.

## **Government Institutions, Chemical and Pharmaceutical Industries:**

IUS support a multitude of businesses with their electrical infrastructure requirements. This can be High Voltage switchgear, transformers, Low Voltage panels, interconnecting cables and containment, battery and charger units, earthing arrangements, electrical protection, system studies, SCADA control, excavation and reinstatement, building works. Whatever is needed, IUS can provide the support you require. This is from both a maintenance and construction perspective.

## **Renewable Energy:**

Decarbonisation is at the forefront of Government policy and IUS are here to assist you with the goals and targets of your business. IUS have been involved in contestable connections and private infrastructure to harness power from wind, solar, wave, anaerobic and heat exchange systems. We are able to assist clients in gaining the maximum benefit from their infrastructure to contribute to the Global Challenge.
